

Customer Churn Analysis Report

Executive Summary

Overall churn rate is 26.6%. The analysis identified several major churn drivers including month-to-month contracts, fiber optic internet service, electronic check payments, and paperless billing.

Key Findings

Customers with month-to-month contracts had the highest churn rate.

Fiber optic users showed higher churn levels.

Electronic check customers churned more frequently.

Long-term customers demonstrated stronger retention.

Recommendations

Encourage customers to switch to yearly contracts.

Promote automatic payment methods.

Improve onboarding for new customers.

Investigate dissatisfaction among fiber optic customers.

Final Conclusion

Customer churn is strongly influenced by contract type, payment behavior, and service usage patterns. Long-term retention strategies can significantly reduce churn.
